A strong op-ed in the Anchorage Daily News refutes the Pebble Partnership's repeated contention that it has "no mine plan." Writers Lindsey Bloom and Brian Kraft detail Pebble's multiple plans filed with state and federal regulators, including a substantial [report filed with the SEC](#) and a lengthy state water permit application to draw water from surrounding rivers and streams.

An excerpt reads: "Mine plans for Pebble exist. The facts prove it. Pebble will kick and scream about it, but these plans show sufficient information about the location, size and geochemical makeup of the deposit, water use, power needs, waste, etc. to have an honest conversation about the impacts of large-scale mining on Bristol Bay and the tens of thousands of jobs generated by Bristol Bay's salmon resource."

The state of Alaska has certified the "Bristol Bay Forever" citizens' initiative, giving organizers nearly a year to gather enough signatures to put the measure on a statewide ballot. The initiative aims to protect wild salmon from any new, large-scale mining in the Bristol Bay Region by requiring the state to restrict projects that would be harmful to the salmon fishery.

Bristol Bay residents expressed disappointment that the state's recent changes to the Bristol Bay Area Plan don't offer enough protection of wildlife, subsistence and public use of wild fish and game. The Department of Natural Resource's proposed changes come after the state lost a lawsuit over its management plans for the state land, which were changed to favor mining with little input from local residents.

Pebble partner Anglo American announced Mark Cutifani as its new CEO. Cutifani takes the helm at a tumultuous time for the company, but Bristol Bay residents are still waiting to see what his approach to Pebble will be. Despite promises to not go where they're not wanted, Anglo American's last CEO pressed on in Bristol Bay in the face of more than 80% opposition to the project.

Lastly, actor Robert Redford is calling for the Obama Administration to use its power under the Clean Water Act to protect the natural resources, jobs, commercial fishery and subsistence harvests of Bristol Bay.

In the Huffington Post, Redford asks Americans to sign a petition to President Obama, writing, "Now, a long-awaited study by the Environmental Protection Agency has confirmed that the Pebble Mine -- along with its estimated 10 billion tons of mining waste -- would spell disaster for Bristol Bay, its legendary salmon runs, its pristine environment and its people."

If there's one thing politicians have in common, it's the abiding faith that if they say something over and over again, that it will become true (at least in terms of public perception). So it's no wonder that the Pebble Partnership -- stocked with former pols and bureaucrats -- have spent millions of dollars on advertising and lobbying to convince us that -- wait for it -- there is no plan to mine in Bristol Bay... **State releases draft of amended Bristol Bay land use plan**

Elwood Brehmer

*Alaska Journal of Commerce*

Groups opposing Pebble Mine are not happy with an amended 2005 Bristol Bay Area Plan released Jan. 4 by the Department of Natural Resources. The amended land use plan is the result of a 2009 joint lawsuit filed in state court by Trout Unlimited, the Alaska Independent Fisherman's Marketing Association and five Bristol Bay area village and tribal councils against the Department of Natural Resources, or DNR... **Residents critical of changes to state's Bristol Bay management plan**

Hannah Heimbuch

*Alaska Dispatch*

Less than a week ago, the state's Department of Natural Resources released the proposed amendments to its management plan for Bristol Bay's state-owned lands. Initial review of these proposed changes has some residents concerned that the revised plan doesn't offer enough protection of wildlife, subsistence and public use of wild fish and game... **It's Time to Stop the Pebble Mine**

Robert Redford

*The Huffington Post*

Since 2010, I have fought alongside the Natural Resources Defense Council to stop the Pebble Mine -- a colossal open-pit copper-and-gold mine that a consortium of global mining giants want to gouge out of the spectacular untamed wilderness above Alaska's Bristol Bay. Nothing like this place exists anywhere else on Earth... [Click here to read more](#)

*The Bristol Bay Times*

Another 12 months have come and gone, and once again Alaskans are nestled in the bustle of the holidays, fast approaching the New Year. Looking back on 2012, there's been plenty to talk about in the Bristol Bay region. Though perhaps nothing so frequently discussed as the looming possibility of Pebble Mine...
